

EMERGENCY RESPONSE PLAN & Emergency Evacuation

Course Introduction:

An emergency can be anything that injures or has the potential to injure your employees, the environment, or your facility itself. Emergencies take the form of accidents, HAZMAT spills, fires, floods, tornadoes, hurricanes, terrorism, earthquake, and virtually any other event that may injure people, the environment, or property. You may be prepared to apply your resources to emergencies that involve your facility but are you prepared for emergencies that require resources beyond those of your company? Are you prepared for emergencies that affect your entire area or community?

Course Objectives:

Upon successful completion of this course, the delegates will be able to:

- Understand roles of the employer and local, state and federal agencies in emergency and disaster response
- Understand and apply the four phases of emergency management
- Learn the guiding principles of a successful, comprehensive emergency management program
- Aware of terrorism and understand the incident command system utilized during an emergency response

Who Should Attend?

This course is intended for personnel and/or employees who form part of a team working within critical areas of emergency response and emergency evacuation plan.
