

ISO 28000 Lead Implementer

Course Introduction:

The ISO 28000 Lead Implementer training course is designed to provide professionals with a comprehensive understanding of how to establish, implement, manage, and improve a Security Management System (SMS) based on ISO 28000. This course will equip participants with the knowledge and skills necessary to align security management practices with international standards, helping organizations mitigate risks in the supply chain and ensure business continuity.

Throughout this five-day training, participants will explore key principles of ISO 28000, including risk assessment, legal compliance, leadership involvement, and continuous improvement. By delving into the standard's requirements and implementation guidelines, attendees will gain insights into managing security risks effectively while enhancing organizational resilience. This course is ideal for those seeking to understand the framework and strategies needed to implement ISO 28000.

Course Objectives:

Upon completion of this course, participants will:

- Understand the fundamental principles and concepts of ISO 28000.
- Interpret the requirements of ISO 28000 and their application in real-world scenarios.
- Identify security risks and threats in supply chain operations.
- Develop policies and procedures for an effective Security Management System (SMS).
- Understand the role of leadership in ISO 28000 implementation.
- Learn how to ensure compliance with regulatory and legal requirements.
- Gain insights into monitoring, measuring, and continually improving an SMS.
- Prepare for the ISO 28000 certification process and audits.
