

COBIT AND IT Governance Foundations

Course Introduction:

Control Objectives for Information and Related Technology (CobiT) is an IT governance, control framework and maturity model. CobiT's purpose is to align IT resources with an enterprise's business objectives so services and information, when delivered, meet quality, fiduciary and security needs. It is also intended as a mechanism to balance IT risks and returns. CobiT defines 34 significant processes, links 210 tasks and activities to them, and defines an internal control framework for them all. CobiT's processes and control objectives are segmented into four domains:

- Plan and Organize (PO)
- Acquire and Implement (AI)
- Deliver and Support (DS)
- Monitor and Evaluate (ME)

Course Objectives:

This course presents the introductory concepts of CobiT and their applicability through the following objectives:

- To understand the concepts and the differences between Corporate Governance and IT Governance;
- To understand the structure and the objectives of CobiT framework;
- To understand the concepts and the terminology used in CobiT framework;
- To understand the relationship between CobiT and other market practices;
- To understand how CobiT can be used as a tool to upgrade activities within the organization;
- To simulate the application of the concepts learned inside the organizational environment through classroom activities;
- To know the existing products offered by ISACA® related to CobiT.
